

What you need to know before we get started

- You should have completed all of the other basic exercises
- The examples for this lesson are in the Frames subfolder and there subfolders

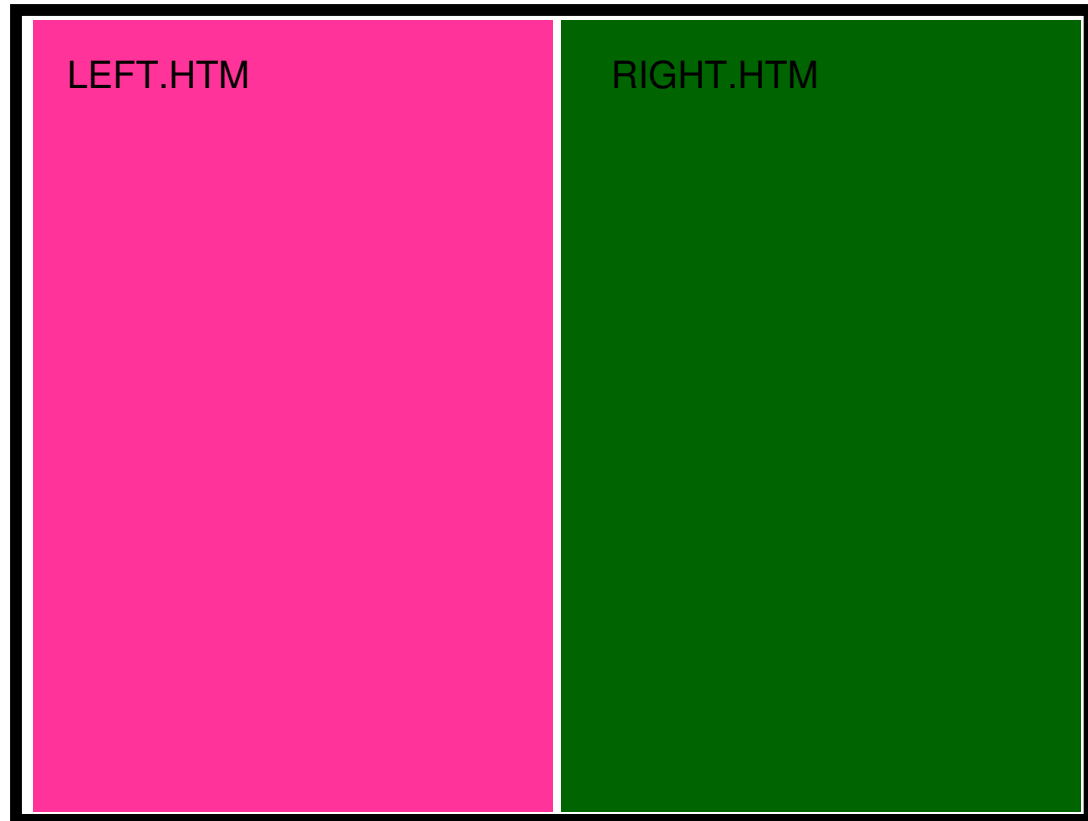

What you will be able to do after this lesson

- Create and use frames

First look at frames - Frameset tag

FRAMES1.HTM

Merely a container to
hold other html document.

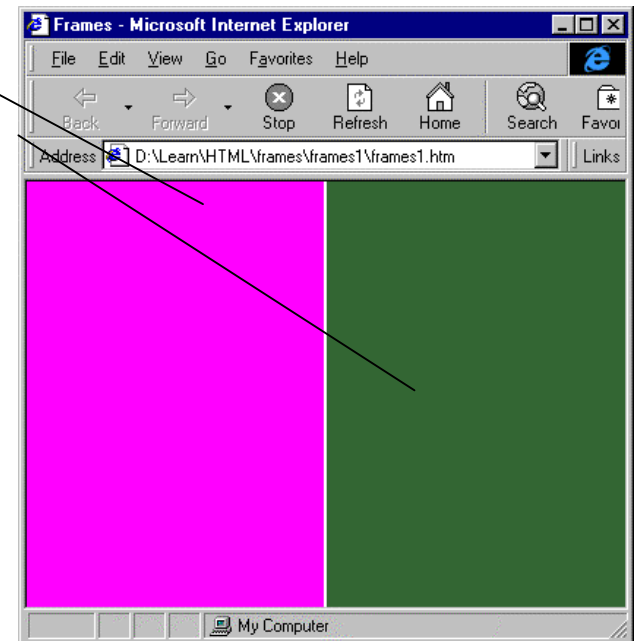

First look at frames - Frameset tag

 html\frames\frames1\frames1.htm

Syntax:

```
<FRAMESET {optional frame attributes} >  
    <FRAME SRC="{html page for frame}" NAME="{name of frame}">  
    <FRAME SRC="{html page for frame}" NAME="{name of frame}">  
    ...  
</FRAMESET>
```

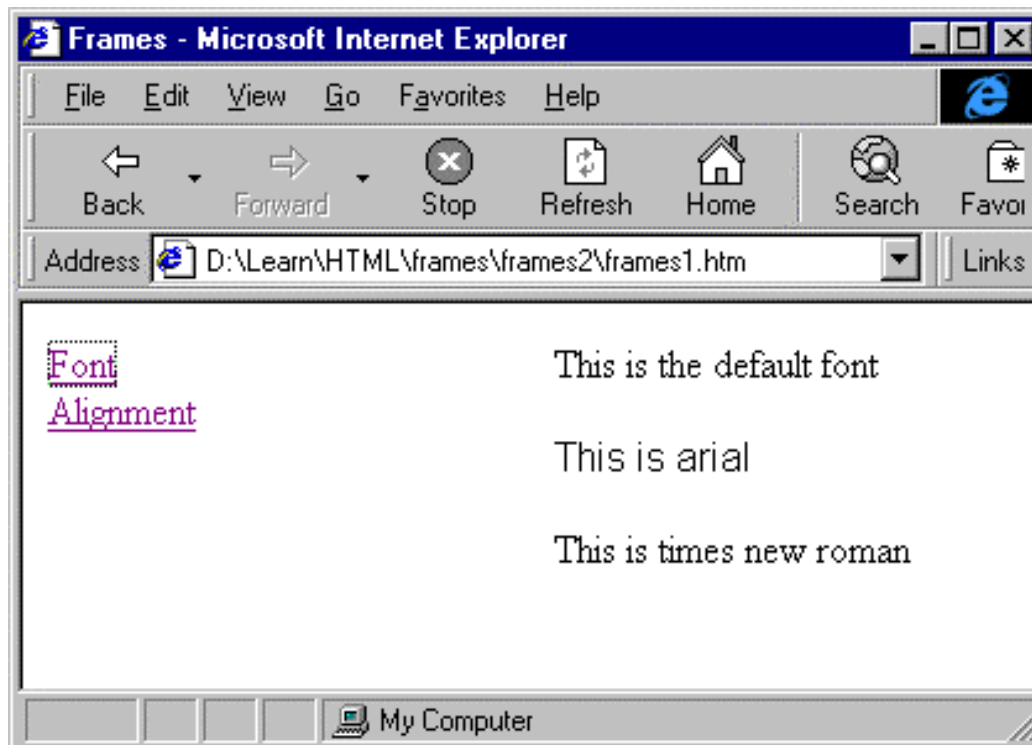

```
<frameset cols="50,50" frameborder=0>  
    <frame src="frm_left.htm" name="left">  
    <frame src="frm_right.htm" name="right">  
</frameset>
```

First look at frames - Using Frames

 html\frames\frames2\frames1.htm

```
<body>  
<a href="font.htm" target="right">Font</a><br>  
<a href="alignment.htm" target="right">Alignment</a>  
</body>
```

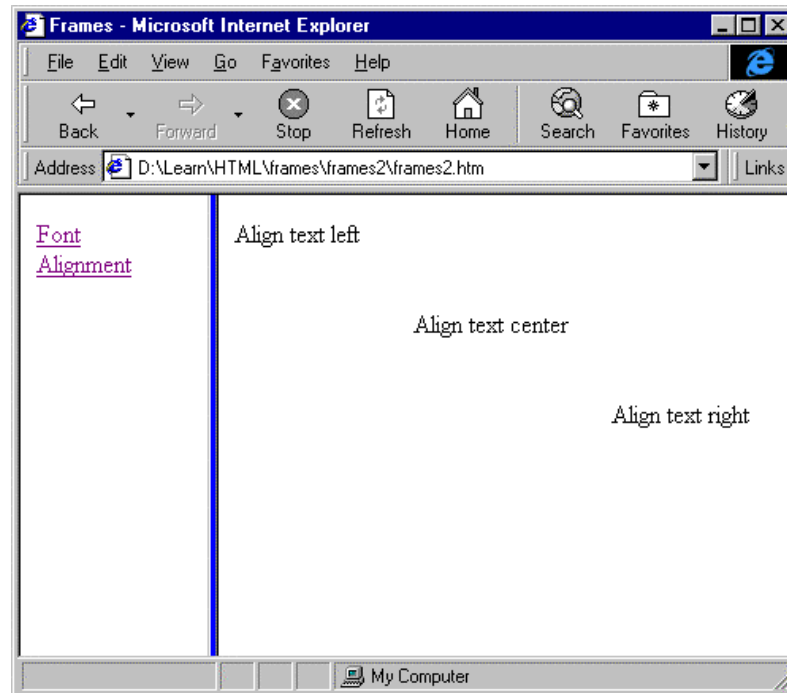

Frameset attributes

 html\frames\frames2\frames2.htm

Syntax:

```
<FRAMESET  
  BORDERCOLOR="value"  
  COLS="value"  
  FRAMEBORDER="value"  
  FRAMESPACING="value"  
  ROWS="value"  
>
```

```
<frameset  
bordercolor="Blue"  
cols="25, 75"  
frameborder="1"  
framespacing="3"  
>  
  
    <frame src="frm_left.htm" name="left">  
    <frame src="frm_right.htm" name="right">  
  
</frameset>
```

Frame attributes

html\frames\frames2\frames3.htm

Syntax:

```
<FRAME  
SRC="value"  
NAME="value"  
NORESIZE="value"  
SCROLLING="value"  
>
```

```
<frame src="frm_left.htm" name="left" noresize>  
<frame src="frm_right.htm" name="right" scrolling="no">
```
